TECHNICAL SKILLS

Languages	: Python, Java, JavaScript, C++, C, SQL, Haskell
Core CS	: Data Structures, Algorithms, Object-Oriented Programming, Database Management, Complexity Analysis
Cloud & DevOps	: Docker, Kubernetes, Git, GitHub, REST APIs, Microservices, CI/CD, Linux
Big Data	: Apache Hadoop, Hadoop MapReduce, HDFS, Distributed Data Processing, Big Data Analytics
AI / ML	: Machine Learning, Deep Learning, NLP, Computer Vision, Scikit-learn, TensorFlow, face-api.js, Time-Series Forecasting
Web & Backend	: ReactJS, Next.js, Node.js, Express.js, FastAPI, Flask, SQLAlchemy, HTML, CSS, Tailwind CSS
Databases	: PostgreSQL, MongoDB, MySQL, SQL/NoSQL
SWE	: SDLC, Agile Methodologies, Software Testing, Test Automation, RESTful API Development

EXPERIENCE

AI & Full-Stack Development Intern

Shri Hari Creations – MediVision AI

Apr 2026 – May 2026

Coimbatore, Tamil Nadu

- Developed an **AI face-recognition module** for a pharmacy-management platform, supporting camera-based scanning, customer enrollment, matching, and automatic identification.
- Integrated the Flask backend and browser dashboard through **REST APIs, face-detection schemas, database models, and client-side scanning workflows**.
- Improved application reliability by fixing **database migrations, inventory and ledger routes, automated tests, and CI integration issues**.

Software Intern

BPCL Kochi Refinery

May 2025

Kochi, Kerala

- Redesigned a critical **E-Register application**, improving operational data accuracy by 25% across refinery workflows.
- Developed a **multi-database report generation workflow** integrating enterprise data from SAP ERP and IP21, reducing report preparation time from hours to minutes.
- Analyzed enterprise application and refinery network architecture, gaining exposure to **industrial data systems, distributed applications, and enterprise software environments**.
- Created technical documentation covering enterprise systems, application workflows, data integration, and network architecture.

EDUCATION

Amrita Vishwa Vidyapeetham

B.Tech in Computer Science

Coimbatore, India

2023 – 2027

Cochin Refineries School

Higher Secondary Education, 83.2%

Thiruvaniyoor, India

2011 – 2023

PROJECTS

DriveAlert AI: Real-Time Driver Fatigue Detection

Python, React, Flask, Deep Learning, OpenCV

- Developing a **real-time AI system** for driver fatigue and microsleep detection using deep learning and computer vision.
- Building a low-latency **React-Flask/WebSocket architecture** for continuous video processing and real-time fatigue prediction.
- Training and evaluating deep learning models on **100GB+ of driver-monitoring datasets** for early fatigue recognition.
- Implementing adaptive fatigue scoring using contextual signals including vehicle speed and continuous driving duration.

AdIntel: Advertisement Fatigue Analytics

Python, FastAPI, React, Scikit-learn, NLP, Tableau

- Analyzed **411 survey responses and 225K+ Google Play reviews** using NLP and statistical techniques to identify patterns in advertisement fatigue.
- Developed an ML analytics platform using **FastAPI and React** to predict user frustration and application rating risks.
- Applied **K-Means clustering** for user segmentation and **Prophet** for time-series forecasting of advertisement-related complaint trends.

MediVision AI – Face-Recognition Module

Python, Flask, JavaScript, PostgreSQL, SQLAlchemy, face-api.js

- Built a **face-recognition module** for an AI-powered pharmacy ERP, enabling camera-based scanning, customer enrollment, matching, and automatic identification within pharmacy workflows.
- Implemented a **real-time face API, payload schemas, database models, client-side scan page, and dashboard status integration**.
- Strengthened data integrity and application stability through database migration fixes, UUID compatibility updates, route restoration, testing, and CI fixes.

Soundarya's Boutique – E-Commerce Platform

Next.js, MongoDB, Stripe, Twilio

- Developed a full-stack e-commerce platform using **Next.js and MongoDB**, integrating Stripe webhooks for real-time order processing and inventory updates.
- Built an administrative dashboard with sales analytics, automated report generation, and downloadable CSV/PDF reports.
- Implemented role-based authentication and automated messaging workflows using NextAuth and the Twilio API.

CERTIFICATIONS & REPORTS

- Google Cloud Fundamentals: Core Infrastructure
- Internship Certificate – BPCL Kochi Refinery
- Comprehensive Internship Report – BPCL Kochi Refinery
